Their contributions in formalizing project management models have provided practitioners with tools to navigate the complexities of modern projects. The two primary frameworks they are known for include the Integrated Project Management Model (IPMM) and the Stakeholder Engagement and Communication Framework (SECF).

1. Integrated Project Management Model (IPMM)

The IPMM is designed to unify various aspects of project management into a cohesive system. Key components include:

- Strategic Alignment: Ensuring project objectives support organizational goals.
- Lifecycle Phases: Covering initiation, planning, execution, monitoring, and closure with iterative feedback loops.
- Resource Optimization: Balancing human, financial, and technological resources effectively.
